Synopsis:

I am a highly motivated registered architect with 30 years of experience in all phases of project development, and construction. I have extensive experience managing client relations, as a department director managing staff, and developing policies to successfully lead teams in the delivery of institutional, commercial, and sensitive historic restoration projects.

Professional Affiliations:

Registered Architect in the State of Michigan since 1994
NCARB since 1994
Active member of SCUP since 2006

Education:

1991-92: Lawrence Technological University, Southfield, MI; BA/Professional Degree, June 1992
1980-84: Lawrence Institute of Technology, Southfield, MI; BS in Architecture, June 1984
1978-80: Michigan State University, Lansing, MI; Basic engineering core courses

Experience:

January 2005 – Present: Wayne State University, Detroit, MI; Director of Design & Construction Services. Responsibilities include managing project staff through all phases of project development and construction, actively participating in project management role for large-scale projects, developing and implementing department policies and customer relations. Featured projects include:

Mike Ilitch School of Business, WSU, Detroit, MI: Project Director for the design and construction of a new 120,000 sf, business school to be sited in downtown Detroit. Anticipated completion, December 2017, project budget: \$55,000,000.

Integrative BioScience Center (IBio), WSU, Detroit, MI: Project Director for the design and construction of a new state funded 207,000 sf laboratory building. Completed July 2015, project cost: \$93,000,000.

A. Paul Schaap Chemistry Building Addition and Renovation to the existing Chemistry Building, Detroit, MI; Project Director for the design and construction of a new atrium, Chair Suite and auditorium addition, as well as the complete renovation of an existing laboratory building, phased over four years. Completed May 2012, project cost: \$62,000,000.

Boiler Implementation Project, WSU, Detroit, MI; Project manager responsible for planning, and coordinating the implementation of 62 new boilers to service 32 existing buildings on campus, including construction of new boiler plants to support equipment. Project included managing the installation of a new 10 pound gas main around campus to support the new equipment. Completed June 2012, project cost: \$41,000,000.

Miscellaneous: Project Director for multiple projects including the complete renovation to an historic water feature designed by Yamasaki, construction of a new classroom building for the School of Medicine, design and construction of a new tennis facility for athletics, design of a new women's basement facility, installation of generators and UPS equipment to support fourteen buildings, fire alarm replacements, and multiple tenant fit outs including scientific equipment installations.

July 2000 – December 2004: Gunn Levine Architects, Detroit, MI; Associate and Director of Construction Services. Responsibilities included establishing department standards and procedures for construction administration services to assist staff in successfully delivering projects. Managed all aspects of the construction administration phase, including customer relations, quality assurance, value engineering, contract negotiations, contract bidding, C of N and permit applications/inspections, coordinating consultants, managing project schedules and budgets, and document control. Featured Projects include:

Renaissance High School, Detroit, MI: New, three story, 300,000 sf high school including classroom/administrative spaces, state of the art auditorium, gymnasium, cafeteria, and pool. Completed June 2005, project cost: \$75,000,000.

Howe Elementary School, Detroit, MI: Two story, 100,000 sf elementary school, fast tracked to be completed in less than 18 months. Completed September 2004, project costs: \$18,000,000.

Detroit Receiving Hospital, Detroit, MI: Renovation to an occupied Emergency Room Suite and adjacent auxiliary services, completed in seven phases over four years. Completed December 2004, project cost: \$21,000,000.

Hillsdale Community Health Center – Hillsdale, MI: Six-phase, two year renovation to an existing occupied emergency and surgical suite. Completed September 2004, project cost: \$5,200,000.

Westshore Medical Center – Manistee, MI: Six-phase, thirty month renovation to an existing emergency room and addition of a second floor to support a new surgical suite. Facility remained fully operational during construction. Completed June 2003, project cost: \$10,000,000.

Cook Administration Building, - Grand Rapids, MI: Repurposing of an existing historic warehouse for a new high-end office faculty. Completed June 2004, project cost: \$1,300,000.

July 1997 – July 2000: Kessler/Francis/Cardoza, Detroit, MI; Associate and Director of Field Services. Responsibilities included coordination of construction documents, bidding, budget management, schedule control, coordinating consultants, and documents control. Featured projects include:

Fraunthal Theater, Muskegon, MI: Historical restoration of a 90 year old theater, stage house, lobby including complete restoration of authentic finishes within the theater, new stage rigging, AV and lighting, and complete replacement of all mechanical systems. Completed September 1999, project cost: \$8,000,000.

Morris Performing Stage House, South Bend IN: Historic restoration to an 80 year old theater, and addition of a new stage house. Project included authentic historic finishes within the lobby and theater, and extending the stage house to support new rigging, AV and lighting. Completed May 2000, project cost: \$14,000,000.

Henry Ford Estate – Dearborn, MI: Renovations and improvements to a historic structure including complete tile roof replacement, installation of new mechanical systems and incorporating a concealed fire alarm system to meet current code requirements. Completed June 1999, project cost: \$2,200,000.

July 1994 – July 1997: Earth Tech Corporation, Plymouth, MI; Project consultant to University of Michigan Dearborn campus to provide complete project management services for a capital improvement project. Featured projects include:

Managing the design and construction of three new classroom and laboratory buildings to support the engineering and business schools. Completed July 1997, project cost: \$15,000,000.

May 1991 – August 1994: A. Vandenbussche, Inc., Grosse Pointe, MI; Consultant to Children's Hospital of Michigan to provide complete project management services for implementation of a capital improvement campaign. Featured projects include:

North Addition, CHM, Detroit, MI: Construction of a new four story addition housing a PET Suite, surgical suites, a new cafeteria and new patient rooms. Completed August 1994, project cost: \$31,000,000.

Emergency Room Renovation, CHM, Detroit, MI: Coordinated the design and construction of a five phase renovation to an existing occupied emergency room. Completed August 1994, project costs: \$21,000,000.

Miscellaneous, CHM, Detroit, MI; managed the design and construction for improvements to a parking deck, and complete replacement of medical gas services to patient care areas.

April 1986 – May 1991: Ghafari Associates, EMSA, Detroit, MI; Project architect. Featured projects include:

Children's Hospital of Michigan Carl's Building, Detroit, MI: Project manager and construction administration for a new four story outpatient faculty. Completed June 1992, project cost: \$13,000,000.

Biological Science Building, WSU, Detroit, MI: New five story, 80,000 sf laboratory and classroom building. Completed June 1987, project cost: \$15,000,000.

Engineering Technology Building, WSU, Detroit, MI; Repurposing of a warehouse facility into a 28,000 sf lab building. Completed August 1991, project cost: \$2,800,000.

August 1985 – April 1988: Jeffsan, Inc., West Bloomfield, MI; Project manager and conceptual estimator for a construction management firm. Responsibilities included complete construction administrations services to estimate, competitively bid and contract projects. Featured projects include:

260 Brown Street, Birmingham, MI: Project engineer for a new three-story office building with two levels of below grade parking located in a busy downtown shopping district. Completed August 1987, project cost: \$1,600,000.

Miscellaneous: Conceptual estimating services for multiple architectural firms and developers with projects ranging from a \$120,000 renovations to \$200,000,000 proposed commercial developments. Continued as a consultant providing conceptual estimating services through 2000.
